DOCTRINAL STANDARDS APP PROJECT

Project Goals

The Doctrinal Standards App will help users

- Understand doctrinal standards
- Understand detailed doctrinal standards for specific topics

Who are the users?

- Users are looking for quick answers to doctrinal questions, either about their own doctrinal system or different doctrinal systems.
- They engage in conversation about doctrinal questions.
- Users are male and female, employed, probably have gone to or are in college or seminary, often married with children.
- May have paper copies of doctrinal standards in the form of Confessions, Catechisms, and Creeds.

What problem do they need solved?

- A searchable database to find information about specific doctrinal standards.
- An interface to access the searchable database.
- Users may or may not want to access Scriptural Proofs for doctrinal questions.

What does an interface solution look like?

A searchable database for three Confessions and three Catechisms.

- Catechisms – a long list of topical questions
 - Westminster Shorter Catechism (107 questions)
 - Westminster Longer Catechism (196 questions)
 - Heidelberg Catechism (126 questions)

- Confessions – chapters containing sentences with numbers. The numbers reference Scriptural Proofs for concepts in the chapter.
 - 1689 Second London Baptist Confession
 - Belgic Confession
 - 1646 Westminster Confession of Faith
 - PCA, OPC Revision
 - RPCNA Revisions
 -

DESIGN TENETS

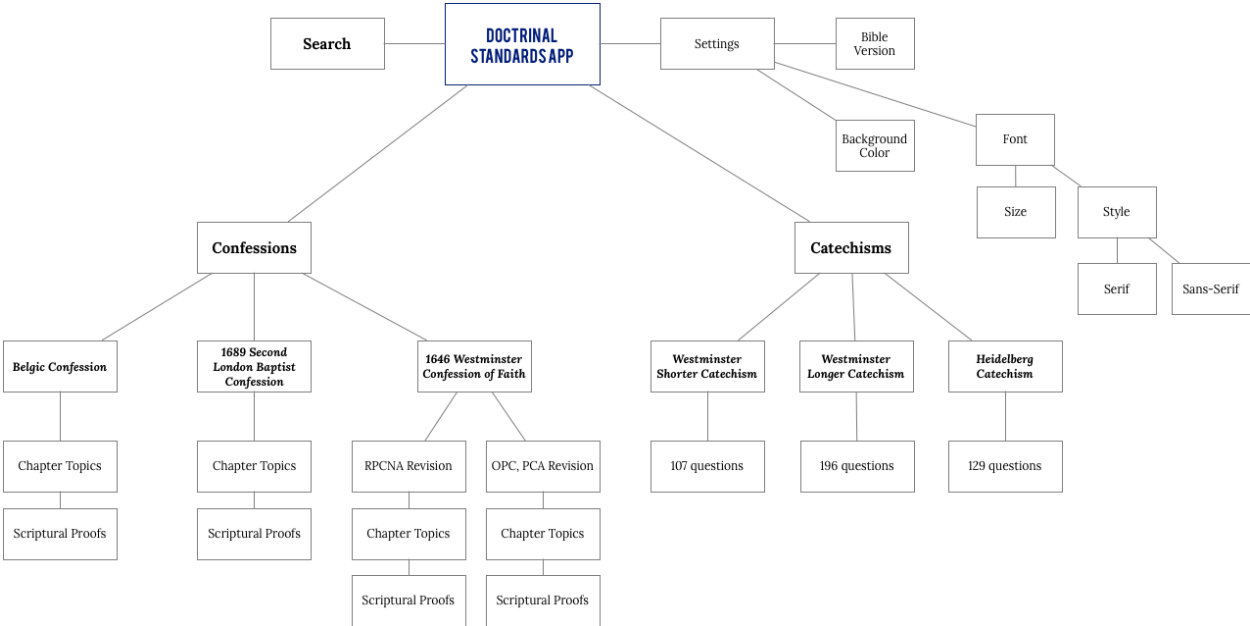

Current Design Feasibility

- Quick access to Confessions and Catechisms.
- A searchable database.
- Scriptural Proofs should be available, but optional.
- Clear wayfinding for complex content.
 - At a glance, users should know where they are in the content.
- Customizable settings
 - Bible Version
 - Font style
 - Background color

Future Design Options

- Timelines
- Creeds
- Filter by metadata tags
- User Highlight
- User Bookmarks
- User Notes

APP FLOW CHART

PROJECT TIMELINE

Research, design, and asset delivery is flexible.
